

My 4 Graph Story

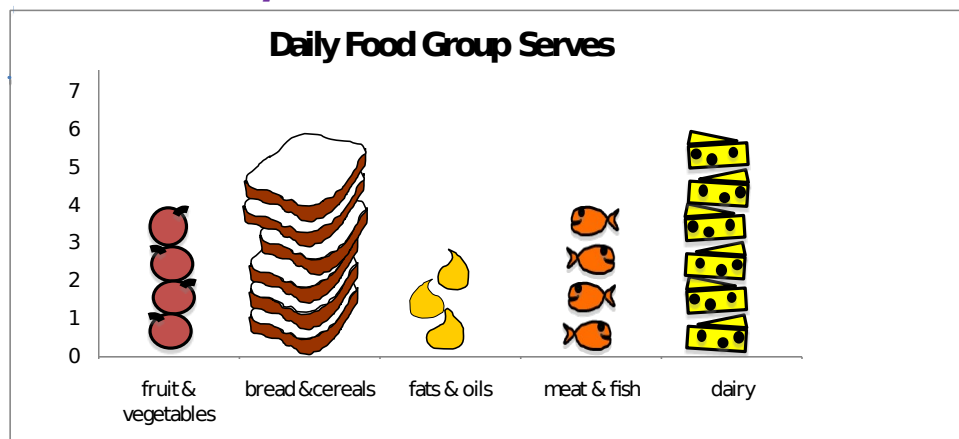

When data is collected it is organised into tables and graphs so that any patterns or trends can be quickly identified. The following tables and graphs relate to the activities of a student on one typical Saturday.

Use this set of graphs as the basis to write a story about how the student spends the Saturday. The student can be you or someone completely made up. You must use the information from all of the graphs and tables. Everything you write must be accurate and based on these facts, however you need to make your story as interesting as possible. You can write it as a diary or a story.

1b. Pie Chart

2b. Picture Graph

3b. Frequency Table

Instances of Transport used	Tally	Frequency
walking		10
car		5
bicycle		3
bus		2

4b. Dot Plot
